AMENDMENT UNDER 37 C.F.R. §1.116

Application Number: 10/084,884

Our Ref: Q68485 Art Unit: 2633

AMENDMENTS TO THE CLAIMS

This listing of claims will replace all prior versions and listings of claims in the

application:

LISTING OF CLAIMS:

1. (CURRENTLY AMENDED) A WDM optical communication system, said system comprising:

input means and output means for an optical signal, an optical fibre path connecting

signal-transmissively said input and output means, wherein the optic signal is amplified by

means of Raman amplification and said optical fibre path comprises at least one Raman

amplifier, further comprising WDM means for coupling at least two polarized pump radiation

wavelengths with wavelengths less than the signal radiation wavelength into said Raman

amplifier, wherein the polarization of one of the pump radiation wavelengths is maintained at a

predetermined difference in polarization has a selected different polarization with respect to the

polarization of the other pump radiation wavelengths,

wherein,

the polarization of the pump radiations of the lower part of the pump wavelength band is

orthogonal with respect to that of the upper part.

2. (ORIGINAL) Amplifier according to claim 1, characterized in that the Raman amplification is a

distributed Raman amplification.

2

AMENDMENT UNDER 37 C.F.R. §1.116

Application Number: 10/084,884

Our Ref: Q68485 Art Unit: 2633

3. (ORIGINAL) Amplifier according to claim 1, characterized in that the Raman amplification is a

localised Raman amplification.

4. (CANCELED).

5. (CANCELED).

6. (PREVIOUSLY PRESENTED) Amplifier according to claim 1, characterized in that the

amplification is in the C- or L-Band and the lower part of the wavelength band comprises

wavelengths 1427, 1439, and 1450 nm and the upper part comprises a wavelength of 1485 nm.
